

## 👤 About Me

Passionate in technology and AI, I have a diverse experience in tutoring, sales, and tech. From improving IGCSE students' grades to building AI models, circuits and websites, I am a resilient leader who thrives in dynamic environments. Skilled in teaching, coding and community engagement, I drive impact through innovation and strategic execution.

## 🏆 Achievements

## 💼 Experience

### (February 2025 - April 2025)

#### TECH INTERN

Hyperbyte AI Solution SDN.BHD

- Worked with Cambridge and McKinsey trained founders to build an AI taxonomy classifier LLM, leveraging manual data entry to build a clean dataset for training.
- Organized logistics for a 70pax cohort hackathon and networking dinner for Rakan Tutor
- Worked in data science projects using pandas to structure unstructured input data, improving the model's accuracy
- Curated a targeted list of outreach contacts for a major national event.

### (February 2024 - October 2024)

#### JUNIOR SALES EXECUTIVE

AIESEC

- Executed team outreach strategies and attracted 300 leads for Malaysian Youth Volunteer (MYV) through online cold DMS, physical booths and lead-generating events
- Established consultancy spaces to engage leads and pitch AIESEC's MYV programme, driving sign ups.
- Lead and hosted 2 bonding sessions to engage with MYV participants

## Languages

- English
- Chinese
- Malay

## Skills

- Teaching
- Team Leadership
- AI
- Video Editing
- Sales And Marketing
- Python
- Web Development

## Projects

- Traffic light smart system - Code pymata4 and hook it up to an Arduino board to simulate a traffic smart system. I lead and managed a group of 4 students to motivate and delegate task appropriately
